

DAWSON-WAM Ltd is a Civil Engineering and Piling Contractor carrying out contract works which include Marine & River engineering, Design & Build projects, WTW, WwTW, WPS, WwPS, piling operations, pipelines, road and rail works across the United Kingdom, Republic of Ireland and the Channel Islands.

We recognise that we have an opportunity to help protect the environment which we live and work in. Through good management we will ensure that environmental protection and the prevention of pollution are part of all decisions, policies and practices.

We are committed to the protection of the environment, including the prevention of pollution and other specific commitments such as championing CEEQUAL, FORS and Considerate Constructors Scheme best practice. Achieving these commitments will improve our environmental performance, enhance the natural environment and promote sustainable development within the business and as part of a Project Team. We shall manage our environmental obligations by implementing the following:

- Strict compliance with relevant environmental legislation, regulations, codes of practice and other obligations.
- Established management structure with specific responsibility for implementing our environmental policy led by our HSEQ Director.
- Identifying areas of our business which are likely to impact on the environment and measuring our performance against set environmental objectives and targets. Current key performance targets include Waste Management, Environmental Awareness / Practical Spill Training & Reducing Fuel Consumption / Carbon Footprint.
- Promote our policy, foster openness and encourage our employees, subcontractors, suppliers and clients to participate in achieving our environmental goals.
- Continuing to develop our Integrated Management System successful in accordance with the requirements of **BS EN ISO 14001:2015**.
- Encourage environmental responsibility through all levels of our organisation, by workforce awareness, environmental communication and training. Environmental Policy communicated, displayed and available to all.
- Efficient use of materials and resources, avoiding the depletion of natural resources by endeavouring to use materials which come from a sustainable source.
- Preventing pollution, ensuring that operations at construction sites are carried out with full controls e.g. water run off/discharges, fuel storage, waste generation & management and associated activities.
- Ensuring that operations at company head office/workshop are also carried out with full control on all aspects which may have an environmental impact e.g. fuel storage, vehicle maintenance, waste generation and energy use.
- Furnishing sufficient funds and resources needed to meet these objectives.
- Measuring environmental performance by conducting regular environmental audits and assessments of compliance with the Environmental Policy, relevant environmental legislation and satisfy applicable requirements of the company.
